This biplane flew on the fun fly day and had some phenomenal flight

Never got to see this take off; but watched it taxi all over the runway;

characteristics and landed perfectly from what the observer could tell.

This was a P51 Ghost Rider which flew quite nicely despite a spinner coming off and a wheel pant floating down. Landing was perfect.

seemed the like tail wheel was overly sensitive.

Heres the startup of the Ghost Rider.

This is Phil Waul's plane he took out on a near freezing day and managed to get some flights in.

This is a 1980 Carl Goldberg Eaglet 50 equipped with an OS 25. Original radio was a Futaba 72 mhz AM FP-6JN series; but, Conrad decided to convert the radio to a 2.4ghz DMS/DMX system using a LemonRX DIY module. After figuring how to cut in on the PPM signal and mount the 2.4ghz antenna everything worked extremely well. Yes, other than the receiver, everything is original from 1980.
